As a Neurozone® certified coach, we strongly recommend that you coach your individuals or teams/groups using the Neurozone® report system. The Neurozone® reports contain the latest scientific information about the behaviors that you need to inform your client about. While the Neurozone® certification course also provides this information you cannot expect to have this knowledge at your fingertips and therefore will need the report as a definitive guide. In addition, being certified, you will have access to the Neurozone® Glossary of Behaviors, that will serve as an additional guidance to protect the scientific rigor of your practice.

Please note, Facilitations (workshops, key notes, masterclasses, tutorials) require a critical level of Neurozone® based expertise from a facilitator. The Neurozone® Certification Course has not been designed to provide this expertise. Therefore a Neurozone® certified coach/consultant/practitioner is strongly advised against this practice.

I acknowledge the above to be true and correct.

I acknowledge that I am aware that I need to complete the course in the allocated time frame.

I agree that my contact email may be shared with the delegates of the course

Yes

No
